Author Impact Beamplot in Web of Science
Author impact beamplots help you see the citation performance of an author's body of work in one visualization. Use beamplot percentiles to move beyond the single point metric, like the h-index, to venly compare author performance across subject categories.

Monika Kriemler, HBZ

CC-BY & Co: Creative Commons in a Nutshell
CC licenses can be found all around us - on images from the web, shared research data and Open Access publications. But what do they actually mean? And which one is right for sharing your work? Let's find out in this Coffee Lecture.

Anna Véron, HBZ

Do it yourself! Alternative Forms of Publications
By 2024 100% of publicly funded research in Switzerland should be published Open Access. To reach this goal, different action lines are presented in the Swiss National Strategy on Open Access. One action line proposes to bring publishing back to the researcher and try out alternative forms of publishing and how the UZH can help you!

Margit Dellatorre, HBZ
